

# **ACCESSIBILITY PLAN**

The school is built on an elevated site which means that there are steps up to the playground and also inside the school. All reasonable interventions have been made to make the site as user friendly as possible for anyone with mobility difficulties.

## **MAIN ENTRANCE**

The main entrance has a ramp and handrails leading to the main door which opens automatically as you approach it.

The intercom is at wheelchair height.

To exit through the main doors an exit button is available at wheelchair height

## **BOTTOM CORRIDOR**

This is accessible to anyone with mobility difficulties and contain a disabled toilet with all facilities for adults. On the same corridor we also have a child's disabled toilet within a set of children's toilets.

## **DISABLED LIFT**

To enable anyone with mobility difficulties to access the office and top corridor a stair lift is available if they are unable to use the internal flight of steps.

## **TOILETS**

The children toilets are modern and include all health and safety recommendations for children with any kind of disability e.g. bright lighting, correct water temperature, high vision flooring and tiles and a disabled child's toilet. There is easy access to all toilets.

## **OUTSIDE STEPS**

All the steps accessing the playground have handrails at child and adult height. There is yellow edging to all steps in anti-slip paint and highlights step edge for visually impaired.

## **NURSERY**

The steps leading to the Nursery have been spaced to make access easier for parents with buggies and have handrails.

The entrance to the Nursery is via a ramp with handrails
