

Hello Year 2.

Tomorrow's English and Maths lessons will be live on Microsoft Teams.

You will be sent a link for each lesson from Mrs Lane to the email address that you have provided.

Mrs Lane will deliver the lessons and then set you the independent tasks for you to complete.

English Live Lesson starts at 9am.

Maths Live Lesson starts at 10am.

Science will not be taught remotely and the resources you need are provided below.

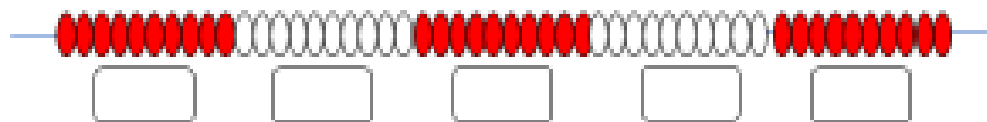

You will to bring the work that you have managed to complete at home into school when you return.

Remember to keep up your reading too. This could be a non-fiction text, a comic or your favourite story book.

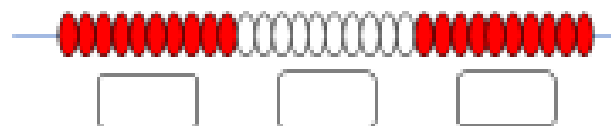

Take care,

Mrs Pearson and Mrs Lane

Can you count the beads in tens to see how many there are?

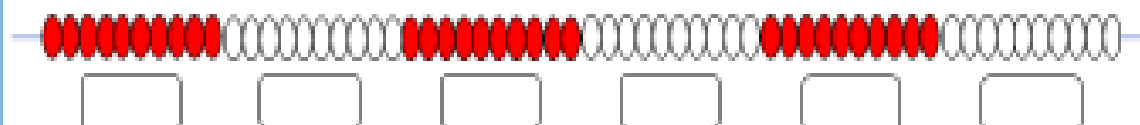

There are _____ beads altogether.

There are _____ beads altogether.

There are _____ beads altogether.

There are _____ beads altogether.

10	20	30	40	50	60	70	80	90	100
----	----	----	----	----	----	----	----	----	-----

Can you count the beads in tens to see how many there are?

There are _____ beads altogether.

There are _____ beads altogether.

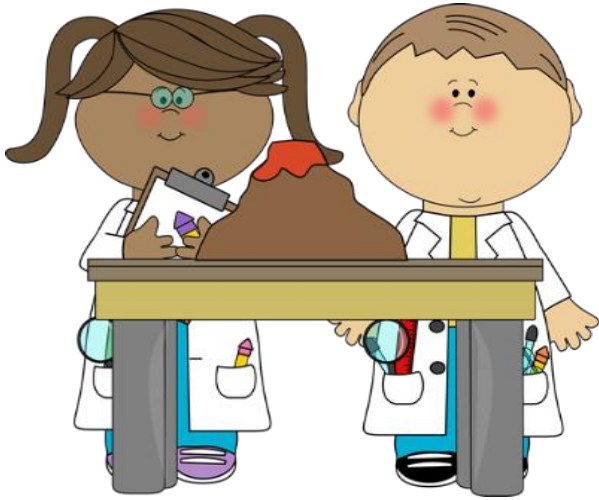

There are _____ beads altogether.

There are _____ beads altogether.

There are _____ beads altogether.

It's day three ***Super Scientists!***

Let's get ready to investigate more about materials.

You have learned so much already!

- Think about what you have discovered about everyday materials so far, write down anything else that you would like to find out.
- Watch the video and play the games about heating and cooling materials -bbc.co.uk/bitesize/topics/zrsgk7
- **Challenge:** Look for signs of *evaporation* and *condensation* in your home.

Can you think of something which changes when it is *heated* or *cooled*?
